

Forklift Electrical Parts

Electrical Parts for Forklifts - Forklifts can be specifically marked to be used in dangerous places. A marked lift truck indicates the design has met the minimum standards of ANSI/UL 558 for engine powered forklifts or ANSI/UL 583 intended for electric trucks for the type of label placed.

Applications for labeled trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Ask your local insurance carrier and Fire Marshall for more information on the approved uses of industrial powered trucks in your application.

If the particular forklift satisfies the outlined standards, labels may be put. A labeled lift truck will show the type of designation located on the nameplate and will have a correctly corresponding label placed.
