Worldwide, Clark has one of the most impressive dealer support networks. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the materials handling industry.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated forklift industry. This exceptional commitment to safety is at this time a standard feature on every lift truck.

Clark has a uncompromising mission to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production plants. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a prevailing industry position.

Clark has preferred the extremely economical and beneficial system of "Lean Manufacturing" for its assembly facilities and use of resources. This system was developed to acknowledge the most effective method of production plant stewardship and ensuring maximum efficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to develop the proficiency and brilliance of their products while minimizing costs. The contemporary value engineering agenda combines progressive product development and offers superior consumer support and service within the industry.
