

JLG Forklift Part

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

Whilst on their journey, John spent time conversing with previous business associates whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered a substantial marketplace for a product that could swiftly and securely elevate individuals in the air to accomplish maintenance and other building services.

After returning from their trip, John set up a joint venture with two of his friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design elements of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into several international marketplaces and continues to develop contemporary machinery to ensure that consumers are able to become safer and more resourceful within their workplace.
